Construction Records Clearance Certificate

Prior to the sale of any building or structure, unless exempted, a certificate shall be obtained verifying that all previous permits have been closed out as necessary.

The Construction Records Clearance (CRC) certificate will list all permits previously obtained, along with the type of work and closing date associated with the construction permit.

Should there be open permits on the premises, all final inspections and prior approvals shall be obtained and the appropriate UCC certificates shall be issued prior to the issuance of the CRC.

Certificates are valid for 6 months from the date of issue unless a change in occupancy has occurred. Should any new construction permits been obtained after the CRC has been issued, the CRC must be updated to reflect the change. Please speak with any staff member in the Code Enforcement Department if you have any questions. There will be no fee charged for reissuing a CRC for work done in association with the sale if it occurs within 6 months of the CRC issuance date.
